

Sandeep Kumar

Spring Boot & Microservices Developer

+91 9711611417 sandeepkr241998@gmail.com linkedin.com/in/Sandeep

Summary

Spring Boot & Microservices Developer with 5+ years of experience in designing, developing, and maintaining scalable backend systems for enterprise applications. Strong expertise in **Java, Spring Boot, Microservices, REST APIs, Kafka, Hibernate/JPA, SQL, and distributed systems**. Experienced in building high-performance APIs, concurrent processing solutions, and production-grade backend services using **Docker, Kubernetes, AWS, and CI/CD**. Strong understanding of Agile methodologies, clean architecture, performance optimization, and scalable system design.

Skills

- **Messaging & Distributed Systems:** Apache Kafka, Redis
- **Backend:** Spring Boot, Microservices, REST APIs, Hibernate, JPA
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Jenkins, CI/CD
- **Developer Tools:** IntelliJ IDEA, VS Code, Postman, Swagger, Maven, Git, SVN
- **Languages:** Java, SQL
- **Monitoring/Enterprise Tools:** Jira, ServiceNow, WinSCP, PuTTY
- **Servers:** Apache Tomcat, WildFly
- **AI Developer Tools:** GitHub Copilot, Cursor, Windsurf, Claude

Experience

Sr. Software Engineer

Tech Mahindra

Gurugram

07/2026 - Present

- **Backend & REST API Development:** Developed and optimized Java & Spring Boot REST APIs for high-volume enterprise file transfer workflows, focusing on performance, reliability, and scalable backend architecture.
- **Concurrency & Virtual Threads:** Implemented multithreaded and concurrent file processing using Java Virtual Threads, improving resource utilization and enabling efficient parallel processing for large-scale file transfer operations.
- **High-Volume Processing & Performance:** Designed and optimized backend components supporting 6+ lakh (600,000+) file transfers, improving API throughput, concurrent processing, and overall system scalability for enterprise workloads.

Spring Boot Developer

Infosys Pvt. Ltd.

Noida

10/2024 – 07/2026

- **Microservices Development & API Enhancements:** Built and enhanced microservices using **Spring Boot & REST APIs**, ensuring scalable and secure backend communication across distributed systems. Improved business logic to support high-traffic telecom applications.
- **Performance Engineering:** Redesigned critical API flows and optimized database interactions, reducing response times during peak loads and improving backend throughput directly boosting user experience for millions of mobile subscribers.

- **BFF Layer Integration:** Contributed to **Backend-for-Frontend (BFF)** architecture, enabling seamless integration with multiple frontend clients (Android, iOS & Web). Ensured smooth orchestration between business logic and presentation layers with minimal latency.
- **Microservices & API Development:** Developed and enhanced **Spring Boot microservices and REST APIs** for high-traffic telecom applications, implementing scalable backend communication and optimized business logic. Contributed to **BFF (Backend-for-Frontend)** architecture integrating Android, iOS, and Web clients with backend services.
- **Performance & Code Optimization:** Redesigned critical API workflows and optimized **database interactions and service-layer logic**, improving API response time and backend throughput during peak loads. Applied **Clean Code, layered architecture, and enterprise coding standards** to improve maintainability and scalability.
- **AI-Assisted Development & Collaboration:** Leveraged **GitHub Copilot, Claude, Cursor, and Windsurf** for code generation, debugging, and test-case creation, achieving **25–30% faster development cycles**. Collaborated with architects, frontend, QA, and DevOps teams to deliver secure, scalable solutions aligned with business and sprint requirements.

Solution Developer

Infoaxon Technologies

Noida

05/2021 - 10/2024

- **Performance Optimization & Scalability:** Optimized SQL queries, service-layer logic, and API workflows to improve response time and backend throughput. Eliminated duplicate logic and core application gaps while implementing scalable enhancements aligned with evolving business requirements.
- **Production Support & Team Collaboration:** Managed development and production support, troubleshooting high-priority issues through log analysis, UAT validation, and phased deployments, contributing to 99% system uptime. Collaborated with stakeholders on requirements and feature demos while mentoring developers on architecture, coding standards, debugging, and API workflows.

Rewards and Certifications

-
- **Mastering Advanced Spring Boot: Microservices & System Design – Board Infinity:** Advanced Spring Boot, Microservices, System Design, and Design Patterns.
 - **Full-Stack Java Development with Spring & Spring Boot – Infosys:** Spring Boot application development, enterprise deployment, and scalability.
 - **Top Performer of the Year – Home Connection Project:** Recognized for exceptional ownership, client communication, timely delivery, product quality, and customer success.

Education

Bachelor of Technology

Computer Science and Engineering

BM Institute of Engineering and Technology

(Affiliated to Guru Gobind Singh Indraprastha University, Delhi)

Sonipat

08/2017 – 06/2021
